DETAILED ACTION

Election/Restrictions

Claims 10-18 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 11/20/06.

Claim Rejections - 35 USC § 102

Claims 1-6,8,19 are rejected under 35 U.S.C. 102(b) as being anticipated by the British '494 patent (British). Figure 1 shows a waste disposer having a discharge chamber surrounding the grinding plate.

Claim Rejections - 35 USC § 103

Claim 7 is rejected under 35 U.S.C. 103(a) as being unpatentable over British. British does not appear to show an increasing gap to aid in material discharge. However, such a gap is known in the mechanical arts. Therefore, in order to aid in material discharge, it would have been obvious for one of ordinary skill in the art to modify British by having the gap increase, since such a feature is well known in the art.

Claims 9,20-24 are rejected under 35 U.S.C. 103(a) as being unpatentable over British as applied to claim 1 above, and further in view of Hogue. British does not appear to use a BPM motor which results in increased apparatus size. Hogue solves this problem by disclosing similar apparatus including the use of a BPM motor. In order to reduce apparatus size, it would have been obvious for one of ordinary skill in the art to modify British by using a BPM motor, taught to be desirable by Hogue.
